WORK EXPERIENCE

WONOLO

Growth Senior Full Stack Software Engineer | Apr 2022 - Apr 2023

- Created fully customizable, auto-refreshing, small & efficiently tested web components consumable by any website with only two lines of embeddable code necessary
- Contributed to the jobs.wonolo.com application for finding curated SEO-optimized content from GraphQL source for potential users to join the application ecosystem
- Refactored the old WordPress site into a NextJS application that's highly optimized for SEO with auto-generated static content for high performance and easy customizability.

MOONRISE

Senior Software Engineer | May 2019 - Mar 2022

- Worked on the proprietary software to enable on-demand work for any qualified contract workers to pick up and complete.
- Created an employment I-9 verification web application with WebRTC and generated legal I-9 Verification forms for employers.
- Contributed to the ongoing development of a remote call center application for workers to make phone calls to client lists with proper data attribution.

HARMONY

Developer Captain | Jun 2021 - Dec 2021

- Help manage open-source software and open forum meetings.
- Helped provide extra documentation and support to community members.

3VUE, LLC

Software Engineer | Feb 2019 - May 2019

- Refactored and delivered project work to clients
- Created web mashups that consumed Qlik sense data into a usable web interface.
- Created templates/boilerplates for varying complexity using the latest React/Redux versions at the time to hasten development speed.

SPOT FREIGHT, INC

Frontend Web Engineer | Sep 2018 - Dec 2018

- Helped refactor code, provided assistance to fellow engineers with debugging, and launched new features and UIs to improve company performance.

DOUBLEMAP

Software Engineer I | Sep 2016 - Aug 2018

- Created many new features for an app similar to Lyft or Uber
- Implemented a redesign of UI/UX from sketch mockups
- Created and managed white-label phone applications for Facebook, Apple, and Nike on the respective app stores
- Won employee of the month and 4 x fellow employee awards

ASCENDIN

Freelance Software Engineer | Jun 2014 - Current

- Help mentor new and aspiring developers through personal 1:1 communication on personally improving and becoming software engineers.
- Created websites for friends and clients who need their businesses to be a solid platform for continuous growth that is easy to manage.
- Craft relevant technical writing for blog posts and documentation resources.

ACTIVUNITE

Chief Technology Officer / CEO | Jun 2018 - Current

- This is my side project for a Gym Management system
- This software ecosystem is currently under construction and uses the latest web technologies to deliver an easy-to-use interface for gym managers, employees, and owners.

NCAA

User Experience Engineer Xtern | Jun 2016 - Aug 2016

- Updated the Dev team's style guide
- Developed two sample applications to demonstrate applying the updated style guide into an STS/Maven Java & Javascript environment.

MENTAL HEALTH AMERICA OF GREATER INDIANAPOLIS

Education User Experience Developer Intern | Sep 2014 - Apr 2015

- Created a web-based application for volunteers to use for training and testing to be certified for MHA activities.

PARTNERSHIP FOR PHILANTHROPIC PLANNING INDIANAPOLIS IN

Web Content Management Intern | Aug 2014 - Dec 2014

- Developed website mock-ups for team members to ensure quality control and client satisfaction before the project development phase.
- Transferred data from the old site into a user-friendly data presentation on the new WIX site
